(Musa velutina)

PINK BANANA

Small banana plants produce the most stunning, glowing, brilliant pink banana you will ever see. This species is relatively hardy, taking a few degrees of frost fairly well.

PLANTING INSTRUCTIONS

Germination can be difficult. Hot water treatment helps. Place seeds in a thermos with 110 F water for 36 hours. Plant into medium, keep soil temp at around 90 F. Care is very easy once seeds germinate.
