(Viola x wittrockiana)

CORONATION GOLD PANSY

60-85 days. Medium to large pure gold blooms are solid gold in color. They look stunning planted en masse, especially in borders and beds, but they also make a stunning potted flower. Plants are cold loving and will tolerate shade. The edible flowers add a touch of regal elegance to baked goods and other culinary creations in need of jazzing up!

PLANTING INSTRUCTIONS

Start seeds indoors in very early spring (or late summer for fall blooms) Grow in full sun to partial shade. Likes cool, moist, woodsy soil, cool-to-cold temps. Occasionally self-sows.
