(Capsicum frutescens)

TABASCO PEPPER

Introduced into Louisiana in 1848 and became the main ingredient in Tabasco Pepper Sauce. Very hot and has a delicious flavor. Grows up to 4' tall and covered with small, thin peppers.

PLANTING INSTRUCTIONS

Start indoors in bright light 8-12 weeks before last frost date. Heat mat helps to warm soil and speed germination. Peppers often appreciate a bit of afternoon shade during the hottest summer weather.
